Projects

Ground Water Quality Analysis of Vrishabhavathi Stretch

The rapid growth of the population in bangalore has outpacked the ability of the government to expand seeage treatment infrastructure. While the waterborne diseases like cholera, diarrhea and other similar diseases still occur with alarming frequecy, ground water quality of Bangalore city has been heavily influenced by the sewage work. The results of the ground water concentration are morecompared to surface water so this helps to test the surface soil in future for agricultural purposes.

Roles and responsibilities

Involved in understanding of the requirements.

Involved in collection of materials required.

Involved in testing of the water samples collected in the environmental laboratory.

Test done for all the water samples collected.
